

PhD in theoretical neuroscience
MSc in space engineering

Education

- 2015 – 2016 **Ecole Normale Supérieure de la rue d'Ulm, Paris**
Master in Cognitive Science. Major in Mathematical, Physics and Computer science Modeling, [Cogmaster](#) programme.
- 2011 – 2015 **ISAE-Supaéro, Toulouse**
Master in Aerospace Engineering. Major in **Automatic Control** and **Space Systems Engineering**. Double diploma with [HEC Paris](#).

Employment history

- Since 2025 **Tenured faculty (ISFP) at Inria, Inria Center at Université de Lorraine and ICube (Université de Strasbourg)**
- 2023 – 2025 **Postdoctoral Associate at the [Rehabilitation and Neural Engineering Laboratory](#), University of Pittsburgh, USA**
I have been awarded a grant from the Swiss NSF to fund my research project for 2 years, studying Brain-Computer Interfaces and connectivity in the human motor cortex.
- 2022 – 2023 **Postdoctoral researcher at the Department of Physiology, University of Bern, Switzerland**
- 2018 – 2022 **PhD candidate in theoretical neuroscience at the Department of Physiology, University of Bern, Switzerland**
Research project on Statistical approaches for synaptic characterization.
- Since 2019 **Founder and Chief Scientist at [LIDE Space](#), Louvain-la-Neuve, Belgium**
LIDE is the first commercial provider of microgravity on gliders, using sailplane gliders to perform parabolic flights.
- 2016 – 2018 **Development engineer at the Attitude and Orbit Control department, [Airbus Defence and Space](#), Toulouse**
Development of AOCS algorithms and software for Eurostar 3000, Eurostar Neo, and Quantum communication satellites.
- 2016 **Master project at the Ecole Polytechnique Fédérale de Lausanne (EPFL), [Center for Neuroprosthetic and Brain Mind Institute](#), Switzerland**
Research project on the Cortical Encoding of Leg Kinematics in Healthy and Parkinsonian Non-Human Primates.
- 2015 **Master project at the French Space Agency (CNES), Attitude and Orbit Control Systems Department, Toulouse**
Research project on periodic control for LEO satellites attitude control systems.

Skills

- French Native language.
- English Fluent, both written and oral. TOEIC score : 985/990
- German Fluent, both written and oral. Goethe-Zertifikat level : C1 (5/6)
- IT Familiar with the following softwares and languages :

Approved research projects and grants

2023 – 2025 [SNF Postdoc.Mobility Grant](#)

Issued by the Swiss National Science Foundation for the research project *Improving the precision, stability and robustness of Brain-Computer Interfaces with Bayesian inference* at the University of Pittsburgh.

Supervision of junior researchers

2023–2024 **Undergraduate research project supervision**

Supervision of a Pitt undergraduate student on the project *Studying the dimensionality of information encoded by the motor cortex*. This project leverages recordings of neuronal activity obtained in humans over several years, and aims at studying how the complexity of brain activity impacts motor control.

Institutional responsibilities and teaching activities

Since 2022 **Reviewer**

I have reviewed submitted articles for [PLOS CB](#), [IEEE Robotics and Automation Letters](#), and [Proceedings of the IEEE](#). I am also a technical reviewer for the 2024 [Cybathlon](#), a competition for assistive technologies, in charge of reviewing the technical documentations submitted by the participating teams.

Since 2026 **Traitement du signal (Teaching Assistant)**, *Télécom Physique Strasbourg*

2024 **Public Health in the Francophone World (invited lecturer)**, *University of Pittsburgh*
Lecture title: When diagnosis and treatment become political

2022 **Physiologie : Synapsen und Regelkreise (Teaching Assistant)**, *Medical school, University of Bern*

Lecture in German for medical students on the basics of computational neuroscience

2019 – 2022 **Physiologie-Praktikum : Okulomotorik und Vestibularapparat (Teaching Assistant)**, *Medical school, University of Bern*

Practical exercises in German for medical students on eye movement

2018 – 2022 **Introduction to biological and computational learning (Teaching Assistant)**, *Master in Biomedical Sciences, University of Bern*

Exercises sessions in English for Master students on the basics of computational neuroscience and machine learning. I wrote a mini-syllabus on basic concepts of calculus and algebra, and received very good appreciations from the students' feedback.

Organization of conferences and workshops

Since 2026 **Organization of the Summer School [Advanced tools for data analyses in neuroscience](#)**, *Université de Strasbourg*

2019 – 2022 **Public Relations Manager for the [Neuro Meetups Bern](#)**
Organization of monthly conferences dedicated to neuroscience and academia.

Awards

2024 **First place in the [Cybathlon](#) competition**

Our PittCrew team won the gold medal during the 2024 Cybathlon (the Olympics of Brain-Computer Interfaces).

2024 **[BCI award](#) nomination**

2019 **\$pace Is Business**

LIDE won the \$pace is Business Competition 2019 jointly organised by the SGAC and the Entrepreneurship and Investment Committee (EIC) of the IAF.

2019 **CNS*2019 Travel award**

Merit-based travel award to attend the 2019 CNS Conference, which was organized by the [Organization for Computational Neurosciences](#).

2015 **Medal of the URISMIP**

I have been awarded the medal of the URISMIP (*Union Régionale des Ingénieurs et Scientifiques de Midi-Pyrénées*, chapter of scientists and engineers of the Toulouse area, now part of the [IESF](#)) and later invited to represent the Isae-Supaéro to the 13th PEGASUS-AIAA Student Conference for the quality of my final report following my research project at the CNES.

2015 **National Finalist of the 2015 [FameLab](#) contest**, (*scientific communication competition*)
